

NGUYEN HUY QUANG

Data Analyst

☎ 0854624879 | ✉ nguyenhuyquangvt@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 📍 Go Vap, HCM

PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Python, Power BI, ETL, and data analysis. Strong background in Mathematics and Data Science, with hands-on experience building analytics pipelines, data warehouses, dashboards, KPI reporting, and A/B testing solutions. Experienced in transforming raw business data into actionable insights for sales, marketing, inventory, and operational decision-making.

EDUCATION

VNUHCM – UNIVERSITY OF SCIENCE

Bachelor of Mathematics and Computer Science

Sep 2020 – Oct 2023

GPA: 8.04/10 (3.42/4.0)

Specialization: Statistics & Probability | **Coursework:** Time Series Analysis, Machine Learning, Data Mining

WORK EXPERIENCE - 🌐 My Portfolio

Data Analyst – OnePOS Technology

Jan 2026 – Present

Tech Stack: PostgreSQL, Power BI, Star Schema, ETL, Excel

- Built ETL workflows to transform sales data into analytics-ready datasets for reporting.
- Developed optimized SQL queries and interactive Power BI dashboards to monitor sales performance, customer behavior, and marketing campaigns.
- Analyzed Sales & Marketing KPIs including Revenue, Orders, CTR, and Conversion Rate to identify business optimization opportunities.
- Conducted A/B testing for advertising campaigns and website experiments, identifying statistically significant results to improve engagement and conversion.

AI Engineer – Penguin Secret Agency

Jun 2025 – Dec 2025

Tech Stack: Python, FastAPI, PostgreSQL, LangChain, GPT-4o/Claude

- Built an AI-powered e-commerce assistant for product Q&A, natural-language search, comparison, and personalized recommendations using LLM Tool Calling and RAG.
- Implemented a hybrid RAG pipeline combining PostgreSQL structured queries and pgvector semantic search to ground LLM responses in verified product data and reduce hallucinations.
- Developed Customer/Admin RBAC, tool-level authorization, real-time streaming, and recommendation ranking based on relevance, price, attributes, ratings, and availability.

Analytics Engineer Intern – PetroVietnam Ca Mau Fertilizer JSC

Oct 2024 – Mar 2025

Tech Stack: Python, SQL Server, Power BI, Data Warehouse, Star Schema, ETL

- Contributed to the development of a Star Schema supporting analytics across finance, inventory, sales, production, and receivables/payables.
- Built ETL pipelines processing **100K+ ERP records/month** using Python and SQL.
- Developed Power BI dashboards for automated reporting and KPI tracking.
- Analyzed sales and inventory data to identify slow-moving products and improve stock allocation.

Teaching Assistant – VNUHCM University Of Science

Oct 2024 – Jan 2025

Tech Stack: Power BI, DAX, ETL, Data Modeling

- Delivered Power BI lab sessions and mentored students on ETL, data modeling, dashboard, and visualization.
- Supported troubleshooting of DAX calculations and reporting issues.

SKILLS

- **Database:** SQL (SQL Server, PostgreSQL)
- **Programming:** Python (NumPy, Pandas).
- **Data Engineering:** ETL, Data Pipelines, Data Warehouse, Star Schema, Fact & Dimension Tables.
- **Statistics:** Exploratory Data Analysis, Hypothesis Testing, A/B Testing.
- **AI Tools:** ChatGPT, Claude, Gemini.
